

StructCrew

AEC TALENT PARTNER

CLIENT TOOLKIT

Company Profile

A specialist hiring partner for architecture, interiors, construction and BIM teams.

STRUCTCREW | AEC HIRING, HANDLED

Architecture | Interiors | Construction | BIM

WHO WE ARE

AEC hiring, handled with context.

StructCrew supports built-environment teams that need relevant talent without asking principals, design leads or project heads to become full-time recruiters.

We calibrate each search around the work itself: project typology, software, documentation standards, site maturity, portfolio quality, seniority, location and the judgement the role requires.

Architecture Project architects, design leads, documentation and technical delivery teams.	Interiors Interior designers, FF&E, visualizers, site coordinators and design managers.
Construction Site supervisors, project coordinators, QS support and execution roles.	BIM & digital Revit, Navisworks, coordination, visualization and production specialists.

HOW WE WORK

A focused search, not a resume dump.

Every engagement starts with a calibrated brief and ends with a clear next-step recommendation.

01	02	03	04
Calibrate the role	Map and approach talent	Screen for fit	Support interviews and closure

Our shortlist notes surface the information decision-makers need early: relevant project experience, software comfort, portfolio signals, availability, communication style and compensation context.

WHAT CLIENTS RECEIVE

Clear inputs. Clear outputs.

Search brief A role map that records the must-haves, trade-offs and non-negotiables.	Shortlist dossier A concise, comparable view of screened candidates and their role fit.
Interview support Coordination, candidate engagement and practical interview feedback loops.	Closure support Offer-stage context, references where agreed, and joining coordination.

Commercials are scoped privately after discovery, based on role complexity, hiring volume, geography and support level.

WORK WITH STRUCTCREW

Bring us the role that matters next.

Share the title, location, seniority, software stack, project type and hiring urgency. We will return with the cleanest practical way to run the search.

Email mail@structcrew.online or start a hiring brief at structcrew.online/contact.

StructCrew works with architecture studios, interior practices, construction companies, design-build firms, developers and specialist BIM teams across India.
